

The steady "flow" in sectoral briefing

- Published since 1991.
- The magazine is a reference point for the sectors of heating, cooling, air-conditioning, natural gas, water supply, bathroom fixtures, sewerage and insulation systems.
- It is addressed to contractors, plumbers, boiler installers and maintenance engineers, engineers, developers, designers, students, as well as constructors, importers and traders of related goods.
- It has changed the sectoral briefing style and quality with authority and consistency towards readers, advertisers and the market.
